DETAILED ACTION

Allowable Subject Matter

1. Claims 1-19, 21-29, and 31-32 are allowed over prior art of record. The following is an examiner's statement of reasons for allowance: Dokic (USPN 5726989) discloses a method and system, comprising: receiving one or more transport packets (*step 202 in figure 5A*); identifying a transport packet as containing audio stream data (*step 208 in figure 5A*) by comparing the PID value of the received packets against PID values of the register. Movshovich et al. disclose an MPEG-2 transport demultiplexor architecture for enhancing transport packet demultiplexing and distribution in a digital multimedia transport packets. Rim et al. teach an MPEG-2 transport decoder including a transport parser unit for storing each syntax field value. All the prior references fail to specifically disclose comparing a value of a first field in the transport packet to a value of a first field register to determine a first outcome in response to identifying the transport packet as containing audio stream data; and determining whether to enable audio stream data related to the transport packet to be received by a system or to discard the transport packet, based at least in part on the first outcome; and a system for parsing audio data having subsystem units interconnected in a manner described in the base claim 15. Furthermore, it would have not been obvious to one of ordinary skill in the art at the time of invention to modify the prior art of record to obtain the claimed invention. Therefore, claims 1-19, 21-29, and 31-32 are allowed over prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 2626

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
